Thur. 29 Aug. 02

Dear Sir,

Let us not go to war. This is no time for invading Iraq. We don't know what we're doing — starting a war in the Middle East will open a Pandora's Box of troubles to add to awful stuff that's going on there now!

If and when we destroy mass destruction weapons in Iraq does one think another rogue somewhere won't pop up with a nuclear bomb! We have to <u>live</u> <u>with</u> it — watch out for it — be ever alert, but these things are not ever going to go away!

Why don't we be a better citizen of the world, quit polluting our water and skies and land, be more agreeable with other nations — <u>learn</u> something of other people!

Sincerely,

[redacted]
