(Kyle Griggs, Contracts Specialist)

8a. Name and Title of Contracting Officer (type or print)

8b. U.S. House of Representatives

8c. Date Signed

(Signature of Contracting Officer) 3/24/2015

Amendment of Solicitation/Modification of Contract Form (8-5-2013 Revision)
1. Has a contractor performed similar work to this for the government in the past?

   Yes, similar services are currently provided by Akamai.

2. Does this require GSA pricing/contracting?

   No, but any prices for services offered on a GSA contract should reference the GSA contract number and pricing.

3. Are there any compliance requirements that are not written out in the statement of work?

   The only compliance requirements have to do with SSL. The SSL certificates must use a key length of 2048 bits or higher, and must have valid root certificates. It is preferred that strong passwords be required to login to the system.

4. How much on-site management is expected?

   No on-site management is expected.

5. Will most of the content be viewed from the U.S. to determine latency?

   Yes, most of the content is viewed from the US and US territories to determine latency. Please remember the House of Representatives has offices in territories (Guam, Puerto Rico, US Virgin Islands, etc).

6. What are the expectations regarding speed to smartphones and tablets?

   For Websites (and for committee streaming?) whether the device is a desktop, laptop, tablet, phone, or wearable, the speed should be the same. There should be no throttling or speed-up based on device type.
