

How to Use www.helpingpatients.org

Welcome to *www.helpingpatients.org*, a new interactive website brought to you by PhRMA and its member companies. This site was designed to help you find patient assistance programs that you may qualify for. This online service is free and completely confidential. All you have to do is answer a few short questions. It will only take a few moments of your time.

PhRMA and its member companies have a long tradition of providing prescription drug medicines free of charge to patients of *all ages* who may not otherwise have access to these necessary medicines.

Before you get started searching for patient assistance programs, please make sure that you have all of the necessary information about yourself or the patient in need. You will need to know the following information:

1. patient's age
2. patient's state of residence
3. estimated gross annual income of patient's household
4. name of the prescription medicine(s) the patient needs
5. type of government, health insurance, and/or prescription drug coverage
