

Congress of the United States

Washington, DC 20515

SUPPORT ENERGY POLICY THAT'S GOOD FOR THE GLOBAL CLIMATE

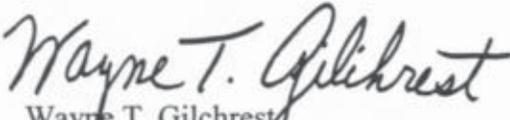

SUPPORT THE BOEHLERT-MARKEY AMENDMENT TO HR 4 SUPPORT THE MARKEY-JOHNSON AMENDMENT TO HR 4

As co-chairs of the House Climate Change Caucus, we urge you to vote in favor of two amendments to HR 4 that would reduce the impact of human activities on the global climate:

- 1) Mr. Boehlert and Mr. Markey's amendment would improve Corporate Average Fuel Economy (CAFE) standards for passenger vehicles. The recently released National Academy of Sciences report indicates that existing technologies are available to improve CAFE standards by far more than called for in HR 4. The Boehlert-Markey amendment would save America up to half a million barrels of oil a day and prevent over 100 million tons of CO2 from entering the atmosphere each year, thereby reducing climate change. We urge a yes vote.
- 2) Mr. Markey and Mrs. Johnson's amendment would strike provisions allowing for exploration in the Arctic National Wildlife Refuge (ANWR). Drilling in ANWR would only exacerbate the Nation's dependence on fossil fuels, which is the leading cause of climate change. Again, we urge a yes vote.

SAY YES TO FORWARD-LOOKING ENERGY POLICY VOTE YES ON BOEHLERT-MARKEY VOTE YES ON MARKEY-JOHNSON

Sincerely,

Wayne T. Gilchrest
Member of Congress

John Olver
Member of Congress
