Spratt Announces Funds for Study of Light Rail Project

WASHINGTON – U.S. Rep. John Spratt (D-SC) announced today that the U.S. Department of Transportation has awarded \$880,000 to the South Corridor Light Rail Project for an “alternatives analysis” study.

The study, the second phase in the project development process, will examine a range of mass transit options for linking Rock Hill and Charlotte and will recommend a locally preferred option.

The new study follows a study that identified corridors, modal options, preliminary costs, and potential ridership.
